PICTURE OF THE WORLD.

Here is a picture of the world: it is a vast globe or ball, surrounded on all sides by a sky sparkling with stars. Its surface is divided into land and water. It has upon it two great Continents, five Oceans, many Seas, and Lakes, and various kinds. Upon the land are multitudes of towns and cities built by men; and on the waters are many ships sailing in various directions, carrying merchandise from one country to another. Men have often sailed quite round the world in ships.

On North America you see trees, the bison, a moose, Indians and towns. On Greenland you see a white bear. On the northern parts of North America, you see pictures of pine trees which grow there. On the south western part of North America, you see mountains, and from the top of one of them you see fire and smoke ascending.

On South America, you see mountains, cities, the anaconda, a large kind of serpent, the alligator, and the condor, the largest bird of flight.

Beyond South America, you see the edge of the Pacific Ocean, this vast ocean extends round behind the world, and covers nearly all that is hidden from your view in the picture. In that

ocean are many islands. The Atlantic Ocean spreads out between America on the left and Europe and Africa on the right. Vessels of all nations are continually sailing in all directions on this ocean. These vessels are generally occupied in carrying goods and merchandise from one country to another.

On the great peninsula of Africa, you see the ostrich, giraffe, or camelopard, lion, crocodile, elephant, hippopotamus, trees, wheat and a negro village. To the right hand of Africa is the Madagascar, on which are a great many people. At the northern part of the picture is the north pole, and the Northern or Arctic ocean. At the south part is the south pole and Southern ocean. On the picture north of Africa is Europe, where you

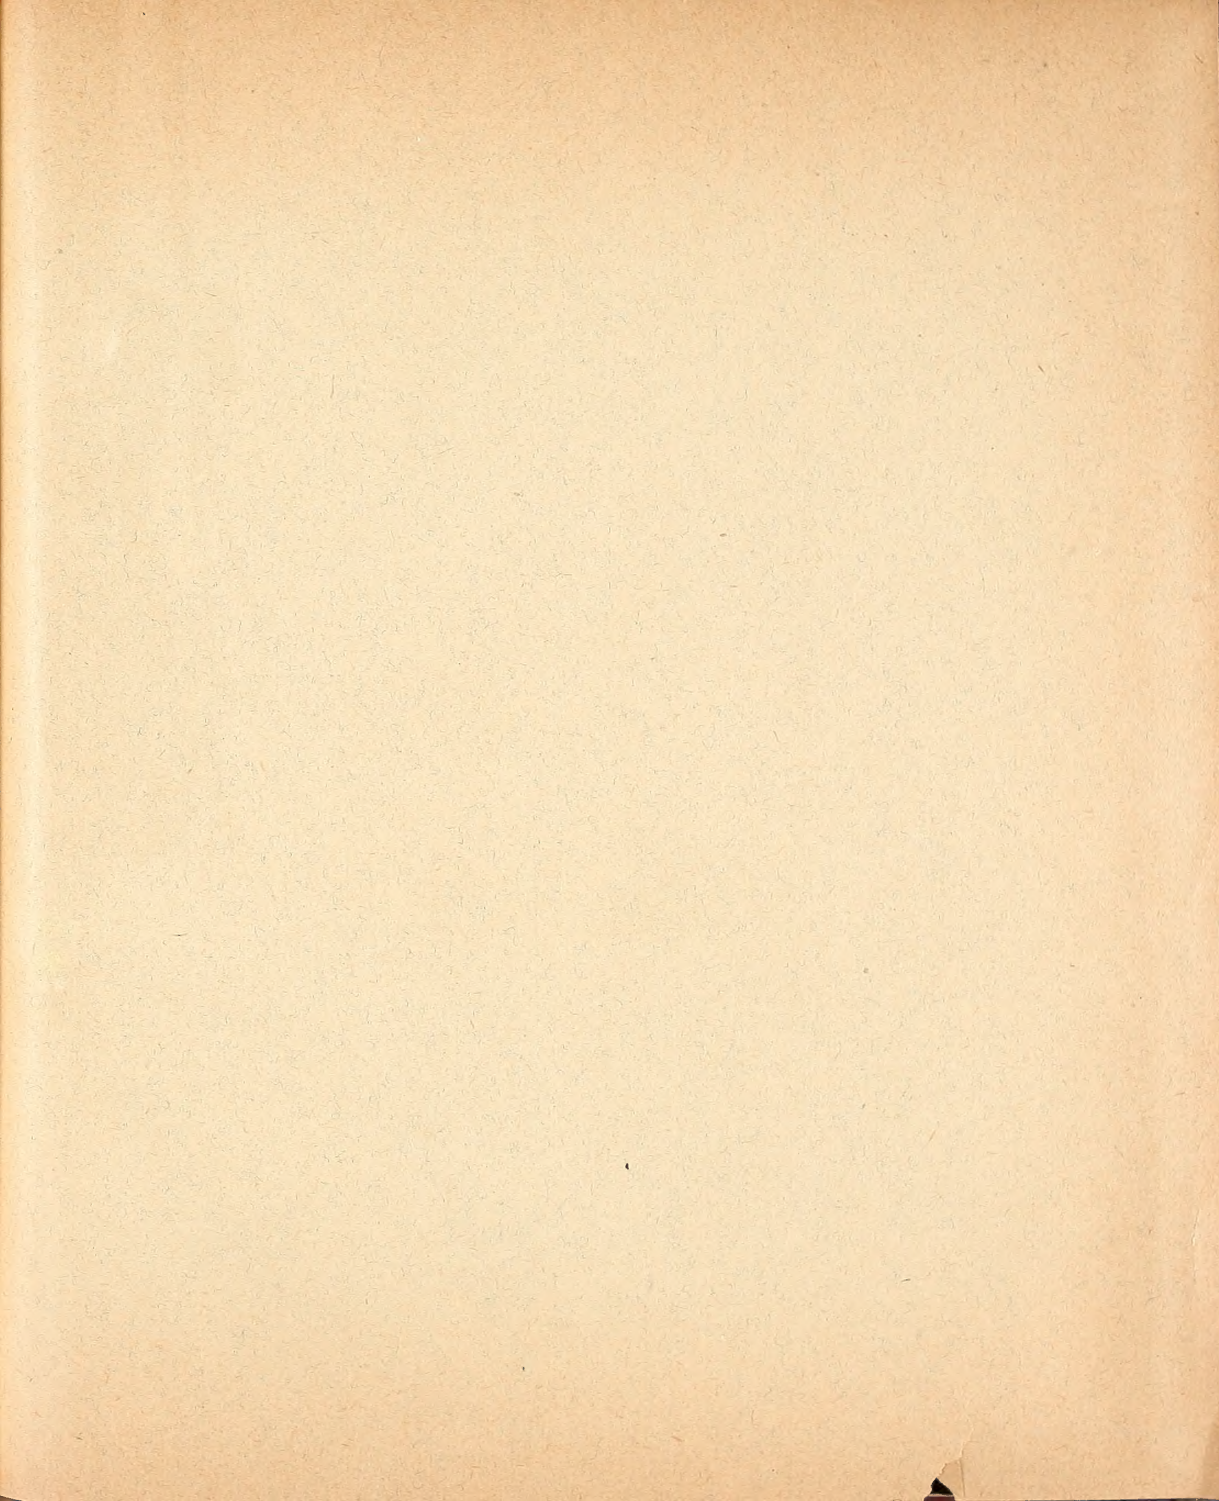

see a horse and cities. In Europe there are many towns and cities and many people. In the northern part, you see a reindeer drawing a Laplander over the snow. Between Africa and Europe is the Mediterranean sea, on which vessels are sailing.

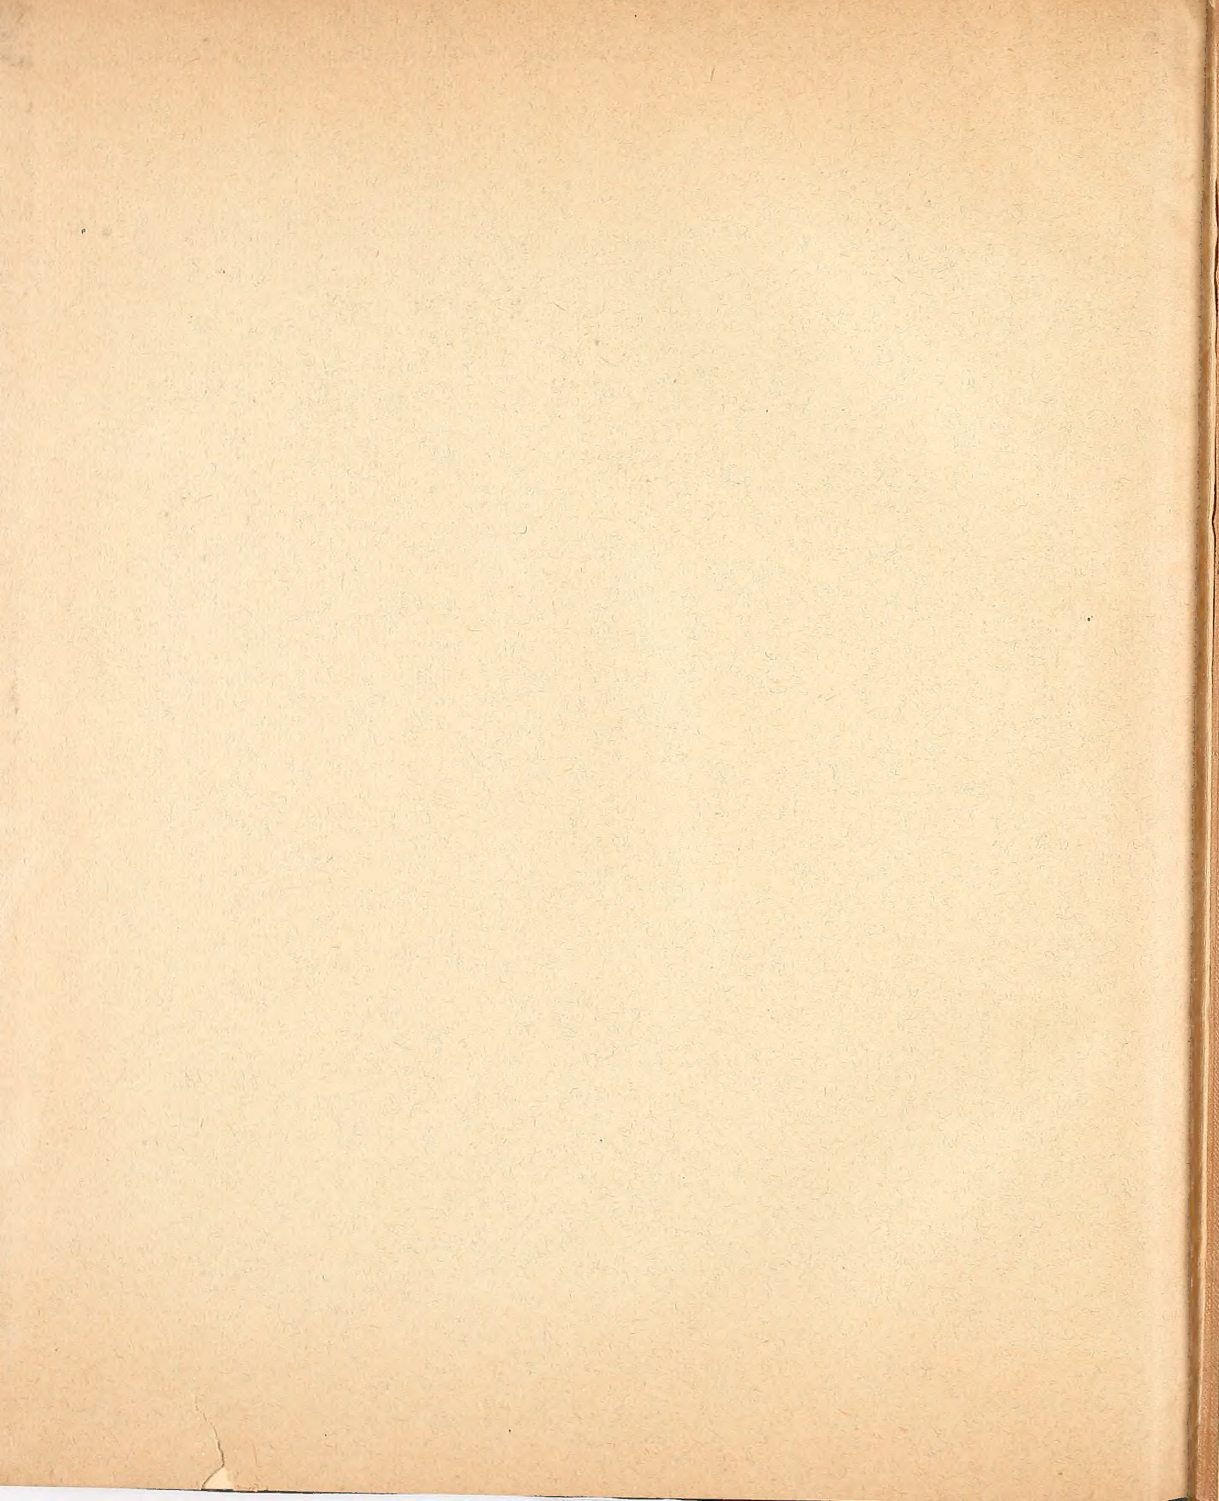

To the east of Europe is Asia. In Asia you see a camel, an elephant, a Mahometan Mosque, and the temple of Mecca. You also see a Tartar riding swiftly on a horse. You also see a picture of a tiger. Where you see a tall steeple or pagoda, is China; and farther round behind the world is the rest of Asia.

The Pacific ocean lies beyond Asia on the other side of the world. It extends from Asia to South America. In that ocean are many islands with many inhabitants upon them.
